

Transport Time!
Can you match the description to the correct sea vessel?

Student Introduction

Draw a line to match the picture of the sea craft and its correct definition.

PADDLE STEAMER

The first type of vessel to have a motor, it had large paddle wheels at each side. So it was like a giant pedalo powered by steam. This meant that it could run to a timetable because it did not depend on the wind.

HOVERCRAFT

A vessel that has propellers to push air below the deck so that it sits on a cushion of air. It can travel over any flat surface: water, grass, sand or roads.

YACHT

A vessel moved by the wind in its sails.

TUG

A small but powerful boat that is used to help large boats move around a harbour.

CATAMARAN

A vessel that has two hulls. These are wider than normal vessels so are great for carrying lots of passengers.

RO-RO

Acronym from 'roll on roll off' this describes how vehicles get on an off the ferry. Before Ro-ro vessels the cars had to be lifted on by crane and this was slow.
